BUILDING

of eye through the blinding of earthly tears and now her eye as clear as heav-en, so full of aches and pains once and now so agile with celestial health, the wrinkles blooming into carnation roses and her step like the roe on the mountains. Yes, I must see her, my grandmother on my father's side, Mary Mc-Coy, descendant of the Scotch. When 1 first spoke to an audience in Glasgow and felt somewhat diffident, being a stranger, I began by telling them my grandmother was a Scotchwoman, and then there went up a shout of welcome, which made mo feel as easy as I do here

You must see those women of the early part of the nineteenth century and those of the eighteenth century, the anthose of the eighteenth century, the answer of whose prayers is in your welfare today. God bless all the aged women up and down the land and in all lands! What a happy thing for Pomponius Atticus to say when making the tuneral address of his mother, "Though I have resided with her 67 years, I was never once reconciled to her, because there never happened the least discord between us, and consequently there was no need of reconciliation."

Make it as easy for the old folks as you can. When they are sick, get for them the best doctors. Give them your arm when the streets are slippery. Stay with them all the time you can. Go with them all the time you can. Go home and see the old folks. Find the place for them in the hymnbook. Never place for them in the hymnbook. Never be ashamed if they prefer styles of ap-parel which are a little antiquated. Never say anything that implies that they are in the way. Make the road for the last mile as smooth as you can. Oh, my, how you will miss her when she is gone! How much would I give to see my mother! I have so many things I would like to tell her, things that have nappened in the 30 years since she went Morning, noon and night let us hank God for the good influences that have come down from good mothers all the way back. Timothy, don't forget your mother Eunice, and don't forget your graudmother Lois. And hand down to others this patrimony of blessing. Pass along the coronets. Make re-ligion an heirloom from generation to generation. Mothers, consecrate yourselves to God, and you will help conse crate all the ages following! Do not dwell so much on your hardships that you miss your chance of wielding an in-fluence that shall look down upon you from the towers of an endless future. I know Martin Luther was right when he consoled his wife over the death of their daughter by saying: "Don't take on so, wife. Remember that this is a hard world for children." Yes, I go further and say it is a hard world for women. Aye, I go further and say it is a hard world for men. But for all wom-en and men who trust their bodies and souls in the hand of Christ the shining gates will soon swing open. Don't you see the sickly pallor on the sky? That is the pallor on the cold check of the dying night. Don't you see the bright-ening of the clouds? That is the flush on the warm forehead of the morning. Cheer up, you are coming within sight of the Celestial City.

His Question Answered.

There have been several boy babies born in Atlanta this past spring and summer. This is not intended as a startling piece of news, because their arrivals have been duly and appropriately

rivals have been duly and appropriately chronicled, but it is only stated as the basis of a little joke.

Some days ago four of the happy young mothers, all of whom had fine boys at home, met in one of the dry goods stores. All of them completed their purchases about the same time. As they were all leaving the store in As they were all leaving the store, in speaking distance of each other, a fresh young clerk, in an effort to be pleasant, fired the stereotyped question at one of them, "How is the boy today?"

In an instant four beaming faces were turned toward him, and four pleased voices answered in chorus, "Oh, he's all right, thank you." The clerk fainted .- Atlanta Constitution.

A Big Difference.

The only difference existing between ourselves and the Americans is that they occupy themselves with material interests and the organization of public wealth while we write verses on liberty and somets to the moon as a solution the reach of other remedies. they occupy themselves with material to our very terrestrial problem. We are the muses, while they are stanch dependers upon reality and earthly things. We are of heaven, and they are of the earth. Victory therefore cannot be doubtful unless we change our tastes doubtful unless we change our tastes. Valuable books mailed free by Swift Specific Company, Atlanta, Georgia.

KNACK IN BURNING COAL.

SMALL NATIONS ECLIPSED.

But In Their Eclipse Lies Their Se-curity Against Absorption. The aspiration with which the queen regent of Holland closes the proclama-tion in which she announces the acces-An old railreader from the coal regions said to your correspondent: "Most people who be hard coal in the kitchen and in the cellar heater have a great deal to learn. They don't keep up with the times at all. They burn coal like their grandfathers did. Now, that's all wrong. You never hear of old and experienced railroad men or miners in the perienced railroad men or miners in the tion of power by the expansion of terricoal regions burning egg coal in their tory. Small nations, those with a popucellar heaters. There was a time when most everybody had the idea that that was the only size of coal to burn in a heater. Egg coal costs from \$4.75 to \$5.50 a ton, according to the distance \$5.50 a ton, according to the distance the rivers are the buyer lives from the mines. Pea nations that would absorb them and the coal costs about \$3.15 per ton. Now, I determination of each of the great powers that the others shall make no acquisition that shall upset the balance of power. For this reason such small countries as Switzerland, Belgium, Holsmall coal in a large cellar heater, he land, Portugal and Greece are allowed to continue on the map. Germany would "The secret is in the raking. If you like to absorb Holland, but that would

not be tolerated by England. France has long cast hungry eyes on our coal-that is, all the fire will be Belgium, but Germany vetoes the fullikely to drop through the grate bars fillment of French desires, and England into the ash pan. What you want to do would not be indifferent. We all recall is to keep a bed of ashes on your grate.

Don't rake down your fire too sharp.

The bed of ashes you keep under your fire will prevent the bot coals dropping his nutrality during Prussia's progress is nutrality during Prussia's progress. in aggrandizement, a slice of Belgium through the grate and it will also protect your grate bars. A great many people who use big coal rake down their
fires too much until the redhot coals get
down, and then they wonder what has
warped their grates. By using small
coal and keeping a bed of ashes on the
wate all the traphs is warted.

It all would like the Swiss cantons.
France would be pleased to rectify her
frontier at the Swissexpense. Germany
has a similar wish, but Austria would
not consent to a partition of Switzerland. grate all the trouble is averted.

"To fire a cellar heater with small that did not give her predominance, and coal takes a little more trouble than against all this the other would be par-with big coal. In using large coal a

Switzerland lives on the summer visitors, and what Portugal lives on is One of the party would not admire much if not more heat from a ton of pea than you can from a ton of egg and save \$1.50 a ton, which is an item. It is a subject worth considering by house keepers. Most everybody knows how to the peace of the peace a country whose population is about 5,000,000, mostly burghers of the most unmilitary taste. The Dutch navy is likewise small, and the carrying trade They gave it up. of Holland is but the shadow of what

The Hollanders are a stout hearted And when they had studied it they understood.—Chicago Tribune with the strong, who have a good or-ganization. That Holland may long ganization. That Holland may long continue to dream beside her canals in peace is the wish of her people, who, h wever, are rather disjuicted at seeing 40 years to restore the orchards to full tious neighboring nations may aspire to control Holland by dynastic alliance and are naturally anxious that the queen's choice of a husband shall not fall upon a prince whose kinsmen may or can make him the agent of a sche to subvert the independence of the kingdom. Holland is a constitutional kingdom, where the people are the class of workteen source of power, but even in such a country the queen's husband may exert an influence which the laws are powerless to defeat .- Beston Transcript.

The Panama Canal.

"Although there is not much talk about it in the newspapers, the construction work now in progress on the Panama canal is on a scale of magni-tude which will bring the enterprise to a successful issue," said Mr. B. L. Hewson of the isthmus of Panama, who is stopping in the city.
"There are now over 4,000 men em-

being done in a thorough and scientific squandered millions of dollars without hardly having a thing to show for the noney that was spent like water.

'The canal company owns the Panama railroad that runs across the isthmus, but the active management is in other hands. All the officers of the road and higher employees are Americans. It is a broad gauged road, 47 miles in length and of recent years has done a heavy business. Its passenger traffic is the highest in the world, as the charge for taking one over the road is \$20 in gold, or almost 50 cents per mile." Washington Post.

That Vanderbilt Necklace.

We are all dving to see the wonder ful necklace of rubies which Mr. George W. Vanderbilt gave his bride, Miss Edith Stuyvesant Dressler. It is said to have cost not less than \$500,000. the largest ruby being worth \$8,500, and the smallest \$4,000. The largest of all these gorgeous gems would measure, so we are told, the depth of a man's thumb nail, if cut through its widest

The original destination of this wonderful necklace was the Paris exposi-tion of 1900. One of the great jewelry firms of the world has been collecting pigeon blood rubies for several years, and it is now believed that Mrs. George Vanderbilt's possession has no rival. The jewelry firm very reluctantly nsented to sell their proposed exhibit young Vanderbilt. I suppose we not see the necklace until after the fair bride meets us all at one of the great halls of the winter. It must be a great responsibility to carry round with one when traveling.—New York Letter London Laties' Field.

A Musical Invention.

Signor Alessio Coradini, an Italian pianist, is said to have invented a system of arranging piano chords so that they cannot lose the tension imparted to them or get out of tune on account of the weather. The invention affects all the chords alike and preserves their all the chords alike and preserved harmonic distances from each other in such a way that, though it may be posto rise or to fall, it is impossible for any single note to get out of tune. The apparatus is simple and is said to be applicable to all kinds of pianos.

Comparative Animal Strength. An effort has been made to determine the pulling strength of elephants, horses and men. Attached to a dynamometer one of the largest elephants belonging to a circus registered a pull of two and feedbants. Mr. Ciemand Mrs. a half tons on a second trial, but a smaller and more active elephant gave did a record of five and one-half tons—whether as a result of a steady pull or a line. sudden jerk appears to be uncertain. A pair of powerful horses registered a ton and a fifth, while it required the strength of 83 men to equal the pull of

Honors For Verdi. When Verdi was elected a member of

the Italian parliament some years ago, Cavour wrote to a friend expressing his satisfaction that the man who had composed the "Miserere" in "Il Trovatore"-the only piece of music which Cayour could ever appreciate—should be a member of the Italian parliament Ly, Harrisonburg Honors, political as well as artistic, have since been showered on Verdi without stint. Many years ago he was created senator, and how his name has been given to the Milan Conservatoire of Music, which henceforth will be

called "Liceo Verdi." Verdi will probably open the autumn term in person, and it is not improbable that on that occasion he may remind his hearers of the time when the directors of that very institution refused to accept him as a pupil on account of "insufficient aptitude for music." Before the end of the year it is also expected that Verdi will receive the supreme honor of being created a Knight of the Annunziata, and consequently, by courtesy, a cousin of the king.—Exchange. Ar. Washington Lv. Wash Pa. R. R. Ar. Baltimore A Monument For Pretoria.

The Aberdeen Journal publishes pariculars of a colossal granite monument which is being made by an Aberdeer firm to the order of the Transvaal government for erection at Pretoria as national memorial of the repulse of the Jameson raid and a recognition of Pres ident Kruger's patriotism and valuable services to the republic. Considerable reticence is observed with regard to the work, as the contractors, it seems are bound under their agreement not to disclose particulars, but some details have become known. The monument is composed of red Peterhead granite and inclosed by a substructure of about 80 feet diameter. Access is obtained to the main structure by four broad flights of steps. The monument is octagonal in form, 36 feet across and the same in height, forming a solid mass of masonry, on the top of which, it is believed, a statue of the president will be placed.
